

Distributions

These distribution lists are intended as a quick reference for narrators. They are not intended to be complete listings of every possible creature that can appear in a given category. Instead, they list the creatures that are commonly found in each. Thus, although Healing Spirits can be found in the Darkness Age, they are extremely rare then (as is any such entity), and so they are not listed. Similarly, many Chaos creatures can be found in Dragon Pass, but they are rare except in Chaos nests such as Snakepipe Hollow.

Narrators are encouraged to use the *Ages*, *Distribution*, and *Habitat* listings in individual write-ups to choose the creature best suited for a given encounter or episode.

Note that this listing includes some creatures cut from *Anaxial's Roster* for space considerations, and has been updated to include all of the creatures published since that book.
